CONTENTS TO VOLUME 11

PART 1 AUGUST 1961

A simplified analysis of spherical and cylindrical blast waves. By MANFRED P. FRIEDMAN *page* 1

Propagation of a solitary wave along a magnetic field in a cold collision-free plasma. By P. G. SAFFMAN 16

Measurements of entrainment by axisymmetrical turbulent jets. By F. P. RICOU and D. B. SPALDING 21

The flow of thin liquid films between rollers. By E. PITTS and J. GREILLER 33

Stewartson's compressibility correlation in three dimensions. By J. C. COOKE 51

Measurement of interfacial structure for co-current air-water flow. By LEMBIT U. LILLELEHT and THOMAS J. HANRATTY 65

Linearized slip flow past a semi-infinite flat plate. By J. A. LAURMANN 82

Equilibrium layers and wall turbulence. By A. A. TOWNSEND 97

End effects in inviscid flow in a magnetohydrodynamic channel. By G. W. SUTTON and A. W. CARLSON 121

The force on a sphere moving through a conducting fluid in the presence of a magnetic field. By J. R. REITZ and L. L. FOLDY 133

On the dynamics of unsteady gravity waves of finite amplitude. Part 2. Local properties of a random wave field. By O. M. PHILLIPS 143

REVIEWS

Advances in Applied Mechanics 156

Incompressible Aerodynamics 158

PART 2 SEPTEMBER 1961

The motion of a thin oil sheet under the steady boundary layer on a body. By L. C. SQUIRE 161

The motion of a shock-wave through a region of non-uniform density. By G. A. BIRD 180

Cavity flow past a slender pointed hydrofoil. By E. CUMBERBATCH and T. Y. WU 187

A theory for the core of a leading-edge vortex. By M. G. HALL 209

Ship waves in a stratified ocean. By ALBERT A. HUDIMAC 229

An experimental investigation of the oscillating lift and drag of a circular cylinder shedding turbulent vortices. By J. H. GERRARD 244

Analytical theory of turbulent diffusion. By P. H. ROBERTS 257

On the stability of a heterogeneous shear layer subject to a body force. By J. MENKES *page* 284

Unsteady, viscous, circular flow. I. The line impulse of angular momentum. By MERWIN SIBULKIN 291

The boundary layer on a flat plate in a stream with uniform shear. By J. D. MURRAY 309

REVIEWS

Hydrodynamics of Oceans and Atmospheres 317

Lectures on Fluid Mechanics 319

PART 3 NOVEMBER 1961

The mechanism of transition in the wake of a thin flat plate placed parallel to a uniform flow. By HIROSHI SATO and KYOICHI KURIKI 321

A study of natural convection above a line fire. By SHAO-LIN LEE and H. W. EMMONS 353

Experiments on the penetration of an interface by buoyant thermals. By J. M. RICHARDS 369

The effect of a sudden density change on a slightly non-uniform flow. By W. R. HAWTHORNE and P. J. BANKS 385

On corner eddies in plane inviscid shear flow. By L. E. FRAENKEL 400

The reactant concentration spectrum in turbulent mixing with a first-order reaction. By STANLEY CORRSIN 407

Theory of unsteady flow about thin cylinders in fluids of high electrical conductivity. By LEON E. RING 417

Notes on approximations for turbulent flows with large temperature differences. By D. J. TRITTON 440

The transverse force on a spinning sphere moving in a viscous fluid. By S. I. RUBINOW and JOSEPH B. KELLER 447

Photographic evidence of the formation and growth of vorticity behind plates accelerated from rest in still air. By D. PIERCE 460

A turbulent equatorial jet. By ROBERT R. LONG 465

REVIEWS

International Summer Course in Plasma Physics 478

PART 4 DECEMBER 1961

The vapour-screen method of flow visualization. By I. MCGREGOR 481

Natural convection between heated vertical plates in a horizontal magnetic field. By J. FLETCHER OSTERLE and FREDERICK J. YOUNG 512

Magnetohydrodynamic flows of a perfectly conducting, viscous fluid. By F. A. GOLDSWORTHY 519

Surface waves generated by an oscillating circular cylinder on water of finite depth: theory and experiment. By Y. S. Yu and F. Ursell *page* 529

On hydromagnetic waves of finite amplitude in a cold plasma. By P. G. Saffman 552

The distortion of a magnetic field by flow in a shock tube. By M. D. Cowley 567

Relaxation effects on the flow over slender bodies. By J. F. Clarke 577

The Oseen resistance of a particle of arbitrary shape. By Howard Brenner 604

A vortex in an infinite viscous fluid. By Robert R. Long 611

The amplification of a weak applied magnetic field by turbulence in fluids of moderate conductivity. By Keith Moffatt 625
